State Capital Program

State general fund balances and proceeds from General Obligation Bonds, Senior Severance Tax Bonds, Supplemental Severance Tax Bonds and Transportation Bonds are important sources of capital financing for the State. The following table summarizes the capital funding administered by the Board and certain other sources for Fiscal Year 2007 through Fiscal Year 2011.

TABLE 1

**Principal Sources of Capital Project Funding
Fiscal Year Ended June 30
(Dollars in millions)**

	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>
Proceeds from General Obligation Bonding Program⁽¹⁾

Total	\$1,231.7	\$650.3	\$ 604.3	\$ 525.1	\$334.2

⁽¹⁾ Dollar amounts from State Board of Finance funding programs reflect net proceeds available for capital expenditure. Amounts vary annually by legislative action.

⁽²⁾ The Board issues short-term Severance Tax funding notes and Supplemental Severance Tax funding notes to fund the authorized projects. The notes are sold to the State Treasurer and retired within the same fiscal year.

⁽³⁾ In Fiscal Year 2009, due to budgetary constraints, \$148.6 million previously appropriated for Capital Project Funding was reappropriated for purposes other than Capital Project Funding. In Fiscal Year 2010, due to budgetary constraints, \$259.2 million previously appropriated for Capital Project Funding was reappropriated for purposes other than Capital Project Funding.

⁽⁴⁾ In July 2008, the New Mexico Finance Authority entered into a \$200,000,000 line of credit which was drawn upon for transportation related capital expenditures in Fiscal Years 2009-2011. In Fiscal Year 2011, the New Mexico Finance Authority refunded the line of credit through the issuance of State Transportation Revenue Refunding Indexed Notes (Subordinate Lien), Series 2011A-1, 2011A-2 and 2011A-3, the proceeds of which are available for transportation related capital expenditures.

Source: New Mexico State Board of Finance, the Department of Finance and Administration and the New Mexico Finance Authority.

In addition to the General Obligation Bonding Program, the Severance Tax Bonding Program and the Supplemental Severance Tax Bonding Program issued and administered by the Board, there are a number of other sources of funds for capital projects throughout the State. These other sources of funding include surplus general fund appropriations special appropriations and proceeds of bonds issued by, among others, the New Mexico Finance Authority, the State Transportation Commission and state educational institutions.

General Obligation Bonds

Sections 7 and 8 of Article IX of the State Constitution limit the power of State officials to incur general obligation indebtedness in the following ways:

- (a) The State may borrow money not exceeding the sum of two hundred thousand dollars (\$200,000) in the aggregate to meet casual deficits or failure in revenue, or for necessary expenses.
- (b) Other debt may be contracted by or on behalf of the State only when authorized by law for some specified work or object. Such a law takes effect only after being submitted to the qualified electors of the State and having received a majority of all votes cast thereon at a general election. No debt may be created if the total indebtedness of the State, exclusive of the debts of the territory and several counties thereof assumed by the State, would thereby be made to exceed 1 percent of the assessed valuation of all property subject to taxation in the State, as shown by the last preceding general assessment.
- (c) The State may contract debts to suppress insurrection and to provide for the public defense. .

Outstanding and Additional Parity General Obligation Bonds

The principal amounts of outstanding General Obligation Bonds, as of December 31, 2011, are shown in Table 2.

Severance Tax Bonds

The Severance Tax Bonding Act, Sections 7-27-1 to 7-27-27 NMSA 1978, as amended, permits the State Board of Finance (the “Board”) to issue two categories of bonds against Severance Tax Bonding Fund (the “Bonding Fund”) revenues: “New Mexico Severance Tax Bonds,” referred to herein as “Senior Severance Tax Bonds,” and “New Mexico Supplemental Severance Tax Bonds,” referred to herein as “Supplemental Severance Tax Bonds.” The Board is prohibited by statute from issuing Senior Severance Tax Bonds and short-term Senior Severance Tax Funding Notes unless the aggregate amount of total Senior Severance Tax Bonds and Funding Notes outstanding, after giving effect to the proposed issuance, can be serviced with not more than 50 percent of the annual deposits into the Bonding Fund from the preceding fiscal year. The Board is prohibited by statute from issuing Supplemental Severance Tax Bonds unless the aggregate amount of Senior Severance Tax Bonds and Supplemental Severance Tax Bonds outstanding, after giving effect to the proposed issuance, can be serviced with not more than 62.5 percent of the annual deposits into the Bonding Fund from the preceding fiscal year. In addition, short-term Supplemental Severance Tax Funding Notes may be issued if the debt service on such Supplemental Severance Tax Funding Notes, when added to the debt service previously paid or scheduled to be paid during that fiscal year on Senior and Supplemental Severance Tax Bonds and Funding Notes does not exceed 95 percent of the deposits into the Bonding Fund from the preceding fiscal year. The Senior Severance Tax Bonds and Funding Notes fund all types of capital projects while Supplemental Severance Tax Bonds and Funding Notes are earmarked for capital projects for public education.

The Board has authority to issue Supplemental Severance Tax Bonds for public school projects in amounts certified to the Board from time to time by the Public School Capital Outlay Council of the State. The lien of the pledge of such Supplemental Severance Tax Bonds (including short-term funding notes) is subordinate to any outstanding Senior Severance Tax Bonds.

Section 7-27-8 NMSA 1978 requires that on each December 31 and each June 30 the State Treasurer shall transfer to the Severance Tax Permanent Fund all money in the Bonding Fund except the amount necessary to meet all principal and interest payments on bonds payable from the Bonding Fund on the next two ensuing semiannual payment dates.

Outstanding and Additional Senior Severance Tax Bonds

The principal amounts of outstanding Senior Severance Tax Bonds, as of December 31, 2011 are show in Table 4.

Tax Revenue Anticipation Notes

The State has issued, and expects to issue from time to time, Tax Revenue Anticipation Notes (“TRAN”). The TRAN are not general obligations of the State. The purpose of the TRAN is to fund a portion of the State’s cash flow needs during the fiscal year in which the TRAN are sold. The State Treasurer’s Office issued \$200 million in TRAN which closed on July 21, 2010 at a cost of 0.305 percent. This Series 2010 TRAN matured on June 30, 2011.

Severance Tax Bonding Fund and Debt Service Requirements

Severance tax receipts contributed 92.9 percent of total revenue to the Bonding Fund in Fiscal Year 2011, with the remainder attributable to interest and reversions. Severance taxes are almost entirely attributable to natural gas, crude oil and coal sales. Natural gas and crude oil together accounted for approximately 95.6 percent of total Fiscal Year 2011 severance tax receipts as shown in Table 8. This percentage is calculated net of Intergovernmental Tax Credits.

⁽¹⁾ All receipts, expenditures and balances exclude amounts in rebate accounts retained for potential arbitrage rebates.

⁽²⁾ Proceeds and expenditures attributable to refunding bonds are excluded from this table because such proceeds and expenditures are reserved for payments on appropriate refunding bonds and are not available for debt service payments on other Severance Tax Bonds.

⁽³⁾ The Board issues short-term Severance Tax funding notes and Supplemental Severance Tax funding notes to fund the authorized projects. The notes are sold to the State Treasurer and retired within the same fiscal year.

⁽⁴⁾ The ending balance includes the amount of the transfer to the Severance Tax Permanent Fund, which was made on July 31, 2008 in the amount of \$41.1 million.

⁽⁵⁾ The ending balance includes the amount of the transfer to the Severance Tax Permanent Fund, which was \$27.5 million. An initial transfer of \$30.1 million was made on July 14, 2009. After further review, a reversal to the Severance Tax Bonding Fund of \$2.6 million was made on November 23, 2009, to reflect the correct amount necessary to be transferred.

⁽⁶⁾ The ending balance includes the amount of the transfer to the Severance Tax Permanent Fund, which was made on July 1, 2010 in the amount of \$3.5 million.

⁽⁷⁾ The ending balance includes the amount of the transfer to the Severance Tax Permanent Fund, which was made on August 3, 2011 in the amount of \$7.6 million.

Investments

Funds on deposit in the Bonding Fund and in the various Project Funds are invested by the State Treasurer at the direction and approval of the Board, pursuant to the State Treasurer's Investment Policy ("Investment Policy"). For a description of the Investment Policy, see "[Appendix A](#)." Investments are made in securities, which are at the time legal investments of the State, and no such investment or deposit shall violate any applicable restrictions imposed by the Code (defined below) and applicable Treasury Regulations relating to the market price and the existence of an established market.

Except for funds deposited into the Rebate Fund for any bond series (defined in the Bond Resolution), net interest earned on the amounts on deposit in the Debt Service Account for those bonds shall be retained therein, and net interest earned on amounts on deposit in the Project Fund for those bonds shall be credited to the Debt Service Account for those bonds and applied to the payment of principal and interest on the bonds next becoming due. Any net loss resulting from any investment shall be charged to the applicable account from which such investment was made.

Severance Tax Collections and Reporting

Operators, purchasers and working interest owners are required to submit monthly reports to the TRD showing the total value, volume and kind of products sold from every production unit each month. Taxes must be paid at the same time and are due 55 days after the month of production. Each production report must be accompanied by a company identification number, which facilitates automated processing of return information. Production and associated tax liability are reported by "production unit" and a designation for a well or group of wells that is assigned by the TRD based on the master operation, property name identification and pool. A suffix is added to the production unit number to designate the specific land type and taxing authority including county, school district, and municipality. During

calendar year 2009, the TRD received an average of 575 oil and natural gas returns per month containing an average of 97,716 lines of detailed information about production from different production units.

Complete reporting forms must be mailed or delivered, or their information electronically transmitted, on or before the 25th day of the second month after the calendar month for which the report is required. Taxpayers whose total tax liability for the month (including the oil and gas emergency school tax, the oil and gas conservation tax and the oil and gas ad valorem tax, as well as the oil and gas severance tax) exceeds \$25,000 must provide payment by automated clearinghouse or by wire transfer on or before the due date. Taxpayers who fail to report or pay in a timely fashion are assessed interest at the rate established for individuals under Internal Revenue Code Section 6621 computed on a daily basis beginning the day after the due date and continuing until the date the tax is reported or paid. A penalty is assessed when a taxpayer fails to pay any tax or file any report by the due date because of negligence or disregard of rules and regulations. A penalty is charged at a rate of 2 percent per month, up to a maximum of 20 percent of the tax due.

The State maintains an automated database system (“ONGARD” for Oil and Natural Gas Administration and Revenue Database) to monitor production and sales activities of oil and natural gas producers. ONGARD functions include: managing the inventory of lands within the state and tracking all leases to determine whether royalty payments are owed to the State; monitoring all oil and natural gas wells for compliance with unitization agreements and other production-related information; and processing tax and royalty payments due to the State. The integrated database gives the State enhanced capabilities to compare and evaluate production, tax and royalty reports, and to issue automated exception reports.

Severance taxes received by the TRD are deposited into the Oil and Gas Suspense Fund. Using the ONGARD system, the TRD reconciles monthly information reports with the payments received to identify the appropriate amounts to distribute to each tax beneficiary. Oil and gas severance tax amounts that have been reconciled and as to which TRD has determined no substantive risk of protest or litigation is present are then transferred monthly to the Bonding Fund.

Severance Taxes on Oil, Natural Gas, and Carbon Dioxide

The State collects taxes on the severance and sale of oil, natural gas and carbon dioxide ("CO₂"). Table 11 summarizes the history of statutory tax rates imposed on natural gas, oil, and CO₂. Tax rates are set by statute, Section 7-29-4 NMSA 1978, and are levied on the volume and/or value of product sold. With the exceptions noted below, tax rates have been imposed on an *ad valorem* basis, with deductions allowed for royalties paid to governments and also for certain expenses of transporting and processing products downstream of the production facility.

TABLE 11

History of Severance Tax Rates on Oil, Natural Gas and Carbon Dioxide

<u>Year of Statutory Change</u>	<u>Natural Gas</u>	<u>Oil</u>	<u>Carbon Dioxide</u>
1959	2.500%	2.500%	–
1974	3.750%	3.750%	–
1977	\$0.050/mcf + surtax	\$0.450/bbl + surtax	–
1980	\$0.087/mcf + surtax	3.750%	–
1987	3.750%	3.750%	3.750%

Oil and Natural Gas Incentives

Although the State offers reduced severance tax rates for several categories of production, prices are above the threshold level, so none of these incentives are presently applicable. Table 12 summarizes incentive tax rates applying to various categories of production as of Fiscal Year 2011. Should prices decline in the future, some of these incentives may become applicable again.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

TABLE 12**Oil and Natural Gas Tax Incentive Programs**

Incentive Category	Incentive Tax Rate	Threshold Price Below Which Incentive Rate Applies	Qualified Production As a Percent of Fiscal Year 2009 Total
Production Restoration Project	0.0000% ⁽¹⁾	\$24.00 per barrel ⁽²⁾ \$24.00 per barrel ⁽²⁾	0.0% Oil ⁽⁴⁾ 0.0% Natural Gas ⁽⁴⁾
Well workover wells	2.4500%	\$24.00 per barrel ⁽²⁾ \$24.00 per barrel ⁽²⁾	0.0% Oil ⁽⁴⁾ 0.0% Natural Gas ⁽⁴⁾
Stripper wells	1.8750%	\$1.15 per mcf-Gas ⁽³⁾ \$15.00 per barrel-Oil ⁽³⁾	0.0% Natural Gas ⁽⁴⁾ 0.0% Oil ⁽⁴⁾
	2.8125%	\$1.35 per mcf-Gas ⁽³⁾ \$18.00 per barrel-Oil ⁽²⁾	0.0% Natural Gas ⁽⁴⁾ 0.0% Oil ⁽⁴⁾
Enhanced oil recovery	1.8750%	\$28.00 per barrel ⁽²⁾	0.0% Oil ⁽⁴⁾

⁽¹⁾ The incentive rate applies for 10 years after the restoration project is completed. Each year's production is tested against the threshold price.

⁽²⁾ Twelve-month average price for West Texas Intermediate crude oil as reported on Oil Postings for last day of each month.

⁽³⁾ Average annual taxable value of natural gas or oil sold in New Mexico during the preceding calendar year.

⁽⁴⁾ No oil or natural gas volumes are expected to qualify for these incentives during the period because average taxable value exceeds the threshold levels.

Severance Tax on Indian Land

The State can tax non-Indian oil and natural gas production on tribal land, according to United States Supreme Court precedent in *Cotton Petroleum Co. v. State of New Mexico*, 490 U.S. 163, 104 L. Ed. 2d 209, 109 S. Ct. 1968 (1989). The State's authority to impose severance taxes on Indian oil and natural gas production on tribal land was upheld by the United States District Court in New Mexico in *Jicarilla Apache Tribe v. New Mexico Taxation and Revenue Department*, No. USDC 87-922. In 2009 however, in *Ute Mountain Ute Tribe v. Homans*, No. CIV 07-772 JP/WDS, the United States District Court for the District of New Mexico (Judge Parker) held that the State may not impose severance taxes on non-tribal operators extracting oil and natural gas on the tribal land of the Ute Mountain Ute Tribe. The Tenth Circuit Court of Appeals overturned the district court opinion and held that the State severance taxes are not preempted by federal law. *Ute Mountain Ute Tribe v. Rodriguez*, 2011 WL 3134838 (10th Cir. 2011). The Ute Mountain Ute Tribe petitioned for an en banc review, which the court denied on September 12, 2011. The Tribe has petitioned the United States Supreme Court for a writ of certiorari.

Information reported on the ONGARD website by TRD based on oil and gas tax return data indicates that natural gas production and crude oil production on Indian land was approximately 3.4 percent and 0.6 percent, respectively, of total taxable statewide production in Fiscal Year 2011. The TRD estimates that oil and natural gas production on Indian land generated \$8.1 million in severance tax revenues to the State in the production months corresponding to Fiscal Year 2011 (net of Intergovernmental Production Tax Credit). Coal production on Indian land was 35.0 percent of total statewide production in Fiscal Year 2010. No potash, copper or carbon dioxide (CO₂) is produced on Indian land.

Section 7-29C-1 NMSA 1978, enacted by the 1995 Legislature, authorized a credit against state production and property taxes for similar taxes imposed by tribal governments. The credit applies to crude oil and natural gas from new wells drilled on or after July 1, 1995 on land within Indian reservation boundaries on March 1, 1995. The amount of the credit is 75 percent of the lesser of state taxes or tribal taxes imposed. If the applicable tribal taxes were raised after March 1, 1995, then the amount of the State's credit is lowered. The ONGARD website reports that total credits claimed under this provision were about \$3.1 million in Fiscal Year 2011. About \$1.3 million of these credits were applied against oil and natural gas severance tax liability. The Bonding Fund revenue projection assumes that this amount will grow slowly in the future.

The 2001 Legislature enacted Sections 7-29C-2, 7-9-88.2 and 9-11-12.2 NMSA 1978, which provided a similar 75 percent intergovernmental tax credit against severance tax and severance surtax on coal mined on the Navajo Nation. The TRD reports that this credit reduced Bonding Fund revenue by \$2.3 million in Fiscal Year 2010.

The enactment of Section 7-31-27 NMSA 1978 created the Jicarilla Apache Tribal Capital Improvement Tax Credit, but this credit does not apply against the severance tax revenues due on the same production. This tax credit is a maximum of 0.7 percent of the taxable value of oil and natural gas products produced on Jicarilla Apache Tribal lands, in addition to the tax credit authorized in Section 7-29C-1 and is claimed as a reduction of emergency school tax amounts. Proceeds of the tax credit must be used exclusively to fund capital improvement projects on Jicarilla Apache tribal lands, although funds may not be used to finance commercial activity.

Carbon Dioxide

The Bravo Dome CO₂ field encompasses 1.2 million acres in Harding, Union and Quay Counties in the northeastern area of the State. It contains estimated resources of 16.3 trillion cubic feet, of which 7.0 to 10.6 trillion cubic feet are considered economically recoverable. Although the State has long produced limited quantities of liquid and solid CO₂ for use in the food and the engineering industries, the main commercial value of CO₂ deposits is derived from the use of the product in its gaseous form in enhanced oil recovery projects in the Permian Basin of Texas and New Mexico. Future sales ultimately will depend on the CO₂ requirements of such projects and on the State's proportion of the market, which is shared with Colorado's Sheep Mountain and Little Sheep Mountain, McElmo Dome and Doe Creek Fields. Sales of CO₂ were approximately 120.7 bcf in Fiscal Year 2011, a decrease of 2.2 percent from 123.4 bcf during Fiscal Year 2010. Production is expected to increase to 122.0 bcf in Fiscal Year 2012 and increase by 5.0 bcf each fiscal year from Fiscal Year 2013 through Fiscal Year 2016. The weighted average wellhead price of CO₂ sales for Fiscal Year 2011 was \$1.24 per mcf reported at the production facility, and is expected to increase to \$1.30 during Fiscal Year 2012, increase by \$0.05 per mcf in each Fiscal Year between 2013 and 2015 and stabilize at \$1.40 in Fiscal Year 2016. Severance Taxes on CO₂ are levied at the rate of 3.75 percent of taxable sales value. Deductions have ranged from 3.9 percent in Fiscal Year 2005 to 23.9 percent in Fiscal Year 2011. Weighted average deductions were 28.0 percent in Fiscal Year 2010. For the December 2011 forecast, a deductions rate of 24.0 percent was assumed over the five-year forecast period.

History of Severance Tax and Severance Tax Surtax on Coal Production in New Mexico

Severance taxes have been levied on coal production in New Mexico since 1937. Revenues were distributed to the State general fund until adoption of the Severance Tax Bonding Act in 1961. Tax rates were imposed on an ad valorem basis, 0.125 percent of value from 1937 to 1974, and 0.5 percent of value from 1974 to 1977. In 1977, rates were converted to \$0.38 per short ton for seam coal and \$0.18 per short ton for metallurgical coal. A severance surtax was also imposed. Subsequent rates were to be determined

annually by multiplying the severance tax per short ton by the percentage increase in the Consumer Price Index ("CPI") from 1976 to the calendar year just prior to the year in which the surtax rates were to be computed. The base severance tax rate was then increased to the current base rate of \$0.57 per ton in 1980. A slightly reduced base rate of \$0.55 per ton was provided for underground-mined coal in 1982.

Effective July 1, 1989, the severance surtax was frozen for a period of four years at \$0.60 per ton for surface coal and \$0.58 per ton for underground coal. When added to the base tax rate, this action had the effect of freezing the total rate at \$1.17 per ton for surface coal and \$1.13 per ton for underground coal. The surtax freeze was to terminate on July 1, 1993.

In 1990 the Legislature exempted from the surtax coal sold under new contracts entered into on or after July 1, 1990, and before July 1, 1994. The exemption also extended to incremental sales under existing contracts measured by the increase in sales over the annual average established in Fiscal Years 1987 to 1989. In 1992 the exemption was extended to incremental sales under renegotiated contracts.

In 1993 the exemption was extended to July 1, 1994. The annual increase was to be based upon the Producer Price Index ("PPI") for coal instead of the CPI. The surtax formula provides that in no case will the surtax be decreased, so a fall in the PPI for coal will not trigger a drop in the surtax rate. In 1994 the exemption was extended to July 1, 1995. In 1995 it was extended to July 1, 1997. In 1997 it was extended to July 1, 1999.

Pursuant to actions of the 1999 Legislature, currently the following coal is exempt from the surtax: (1) coal sold and delivered pursuant to genuinely new contracts entered into on or after July 1, 1990; (2) coal sold and delivered pursuant to contracts already in effect on July 1, 1990, that exceeds the annualized average calendar year deliveries under the contract during production years 1987, 1988 and 1989 or the highest contract minimum during these three years, whichever is greater, unless the deliveries are reduced due to causes beyond the reasonable control of either party to the contract; (3) if a contract existing on July 1, 1990, and renegotiated after May 20, 1992, requires the purchaser to take annual coal deliveries in excess of the greater of the average calendar year deliveries from 1987-1989 or the highest annual contract minimum from 1987-1989, the surtax does not apply to such excess deliveries for the remaining term of the renegotiated contract. Taxpayers were required to register any contract for the sale of qualified coal with the department prior to taking the exemption.

After a number of years of stable revenues, 2011 marked a significant decrease of coal severance tax from \$21.8 million in Fiscal Year 2010 to \$12.4 million in Fiscal Year 2011. This decrease was caused by renegotiation of several long term mine-mouth contracts. Coal sold and delivered under the new contracts is exempt from the coal surtax. The resources excise tax collections increased by 2.6 percent from \$4.85 million in Fiscal Year 2010 to \$5.0 million in Fiscal Year 2011.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

The table below sets forth data on coal production, pricing and average tax rates for the past five fiscal years.

TABLE 13

**Coal Production, Prices, Revenues, and Taxes
Fiscal Years 2007 to 2011**

	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>

Severance Taxes on Other Minerals

Many other minerals and natural resources are taxed in the State upon their severance from the earth or, in some cases, their sale or shipment. Existing tax rates are listed in Table 14. In many cases, flat percentage deductions are allowed to account for certain production costs. The result is that the taxable value is a percentage of the "full value." The "full value," in turn, is sometimes based upon published prices rather than actual revenues. Generally, for products with a price at the point of production, value is that price less deductions allowed for actual costs for hoisting, loading, and crushing of up to 50 percent of price. For products that must be processed before sale, deductions are allowed for cost of processing and freight charges to the point of sale. Several exceptions apply, as detailed below. For potash, the gross value is 40 percent of the posted field or market price, less those actual expenses of hoisting, crushing and loading necessary to place the severed product in marketable form and at a marketable price but allowable deductions may not exceed 50 percent. The gross value for each type of potash and potash product requiring processing or beneficiation (other than sizing) is 33.33 percent of the proceeds realized from the sale of muriate of potash and sulphate of potash magnesia, as standard grades, and 33.33 percent of the value of such products consumed in the production of other potash products, less 50 percent of such reported value as a deduction for expenses of hoisting, loading, crushing, processing, and beneficiation. Gross values for copper, lead and zinc, gold, and silver are 66.66 percent of specified Comex, London Metal Exchange cash price, London Metal Exchange Final, and London spot, U.S. Equivalent, respectively, as published in Metals Week, less 50 percent of the gross value as a deduction for the expenses of hoisting, loading, crushing, processing and beneficiation, regardless of actual expenses incurred. For molybdenum, gross value is the value of molybdenum contained in concentrates

shipped or sold from a mine site, but in no event shall it be less than market value, less 50 percent of the sales value as a deduction for the expenses of hoisting, loading, crushing, processing and beneficiation, regardless of actual expenses incurred. For sand and gravel, in the absence of substantial evidence of a different posted field or market price, it is presumed that the gross value is \$1.75 per ton. In the absence of evidence of lower deductible expenses the maximum 50 percent deduction will be allowed. In determining taxable value, rent and royalty payments to the federal government or the State government are deductible from gross value.

TABLE 14
Severance Tax Rates on Other Minerals

<u>Mineral Resources</u>	<u>Tax Rate</u>	<u>Taxable Value as Percent of Full Value</u>
Potash	2.500	16.67
Copper	0.500	16.67
Timber, Pumice, Gypsum, Clay, Fluorspar, Other	0.125	100.00
Molybdenum	0.125	50.00
Lead, Zinc	0.125	16.67
Gold	0.200	50.00
Silver	0.200	30.00
Uranium	3.500	50.00

Source: New Mexico Taxation and Revenue Department, Tax Analysis, Research and Statistics Office.

Severance tax revenue from potash was \$1.9 million in Fiscal Year 2011, down from \$1.9 million in Fiscal Year 2010. Severance tax revenue from copper, which is limited because of the statutorily defined narrow tax base, was \$403,030 in Fiscal Year 2011, a significant increase from \$290,317 in Fiscal Year 2010 after peaking at \$760,288 in Fiscal Year 2008. Weighted average copper prices were \$3.90 per pound in Fiscal Year 2011 and peaked for the year at \$4.55 per pound in late February 2011.

GENERAL INFORMATION CONCERNING THE STATE OF NEW MEXICO

The State, admitted as the forty-seventh state on January 6, 1912, is the fifth largest state, containing approximately 121,593 square miles. The current population of the State is 2,059,179. The State has a semiarid subtropical climate with light precipitation. Its climate is characterized by sunshine and bright skies in both winter and summer. Every part of the State receives no less than 70 percent sunshine year-round. Humidity ranges from 60 percent (mornings) to 30 percent (afternoons). Thunderstorms in July and August bring most of the moisture. December to March snowfalls vary from 2 inches (lower Rio Grande Valley) to 300 inches (north central mountains).

Governmental Organization

The Executive Branch of State government consists of a Governor, Lieutenant Governor, Secretary of State, State Auditor, State Treasurer, Attorney General, and Commissioner of Public Lands. These officials are elected to four-year terms beginning January 1 after their election. An elected Executive Branch officer may succeed himself or herself in office once. The primary functions of the Executive Branch are currently carried out by the offices of each elected Executive Branch officeholder, in addition to approximately 22 cabinet departments, each headed by a cabinet secretary appointed by the

Governor and approved by the Legislature, and approximately 9 cabinet-level agencies. Elections for all statewide offices were held on November 2, 2010.

The State Board of Finance has seven voting members consisting of the Governor, the Lieutenant Governor, the State Treasurer, and four members appointed by the Governor with the advice and consent of the Senate. No more than two appointed members may be from the same political party. The Department of Finance and Administration (the “DFA”) Secretary serves as the Executive Officer of the Board and is a non-voting Board member. The Board, in addition to other powers and duties provided by law, has general supervisory authority over the fiscal affairs of the State and over the safekeeping and depositing of all money and securities belonging to, or in the custody of, the State. The Governor serves as the President of the Board.

The DFA is the principal financial organization of State government and performs through its divisions the duties and functions relating to State and local government financing and general administration. The executive and administrative head of the DFA is the Secretary, who is appointed by the Governor with the advice and consent of the Senate. The State Board of Finance is a division of the DFA. The Director of the Board is appointed by the Secretary with the approval of the Board.

The Legislature consists of 112 members and is divided into a Senate and a House of Representatives. Senators are elected for four-year terms and members of the House are elected for two-year terms. The Legislature convenes in regular session annually on the third Tuesday in January. Regular sessions are constitutionally limited in length to 60 calendar days in odd-numbered years and 30 calendar days in even-numbered years. Special sessions of the Legislature may be convened by the Governor. Extraordinary sessions may be convened by the Legislature under certain limited circumstances. Legislators do not receive any salary, but do receive per diem and mileage allowances while in session or performing official State business.

The judicial branch is composed of a statewide system including Magistrate and District Courts, the Court of Appeals and the Supreme Court. The District Courts are the trial courts of record with general jurisdiction.

Pension Funds

The Legislature enacted the Educational Retirement Act, Section 22-11-1 et seq. NMSA 1978, and the Public Employees Retirement Act, Section 10-11-1 et seq. NMSA 1978, which created the retirement plans that cover most employees of the State and its political subdivisions. These retirement plans are described below. The Legislature establishes all financing provisions of the plans and the provisions are not subject to negotiation. Financing provisions include employee and employer contributions, fund investment provisions and benefit provisions. As with other pension funds nationwide, New Mexico’s pension funds were affected by the significant market turmoil related to the downturn in the nation’s economy that began in 2008. As of June 30, 2011, the funds had recovered a significant portion of the losses incurred during that period.

Legislative changes enacted during the 2009, 2010 and 2011 regular legislative sessions amended various provisions of the Educational Retirement Act, the Public Employees Retirement Act, and the New Mexico Retiree Health Care Act to improve the long-term stability of these funds.

House Bill 573 (Chapter 288, Laws 2009) increased the years of service requirement from 25 years to 30 years for new members who joined the Educational Retirement Board (“ERB”) and the Public Employees Retirement Association (“PERA”) on or after July 1, 2010. Existing ERB and PERA members remain under the 25-year service requirement. In addition, House Bill 573 increased payroll contributions by employers and employees to the New Mexico Retiree Health Care Fund (the

“NMRHCF”). House Bill 573 also included training requirements for members of the ERB and PERA boards.

House Bill 631 (Chapter 286, Laws 2009) added a section to the Educational Retirement Act to extend the rule whereby ERB members could retire with full benefits if their combined service and age at retirement met or exceeded 75, to a combined service and age at retirement of 80 for ERB members hired after July 1, 2010.

House Bill 351 (Chapter 287, Laws 2009) increased the employer/employee contribution to the NMRHCF from 1.95 percent to 3 percent for most employers and employees. The contribution increase was slightly higher for employees in an enhanced retirement plan. The increase is being phased-in over a four-year period. Due to the passage of this legislation, the NMRHCA estimates that solvency will be extended from approximately 2018 to 2027.

House Bill 854 (Chapter 124, Laws 2009) modified most employer and employee contributions to the State’s retirement funds for Fiscal Years 2010 and 2011, shifting 1.5 percent of the annual contribution rate from employers to employees for those employees with a full-time equivalent annual salary greater than \$20,000.

House Bill 628 (Chapter 178, Laws 2011) extended the 1.5 percent shift made in House Bill 854 for two or more fiscal years and shifted an additional 1.75 percent of the annual contribution rate from employers to employees for Fiscal Year 2012 and Fiscal Year 2013. The employer and employee contribution rates in effect for the plans administered by PERA and for the ERB in Fiscal Year 2012 may continue in Fiscal Year 2013 if the Secretary of the DFA certifies to the Legislative Finance Committee, the ERB and PERA that: (a) general fund revenues in Fiscal Year 2012 will not be at least \$100 million more than forecast to be in the Fiscal Year 2012 budget; and, (b) total state reserve funds at the end of Fiscal Year 2012 will be less than 5 percent of general fund appropriations in Fiscal Year 2012. House Bill 628 also required an actuarial study by PERA and ERB prior to September 20, 2013 to analyze whether contribution rate changes have had an adverse actuarial effect on the retirement systems.

House Bill 129 (Chapter 6, Laws 2011), which requires retired members who return to work with an educational employer pursuant to Paragraphs A, B or F of Section 22-11-25.1 to pay non-refundable contributions to the Educational Retirement Fund equal to the amount paid by non-retired employees. Formerly, the employers had paid those contributions. Employers would continue to pay the employers’ contributions to the Fund for retired members who return to work under the statute.

Educational Retirement Board

The ERB had 130,141 members as of June 30, 2011, including active, retired, inactive vested and inactive non-vested members. The market value of Educational Retirement Fund (the “Fund”) as of June 30, 2011 was \$9.6 billion, which was up from a low of \$5.97 billion in February 2009. The ERB had investment gains for the fiscal year ended June 30, 2011 of 19.9 percent.

In April 2011, the ERB voted to change its assumed rate of return on the pension fund’s investments from 8.0 percent to 7.75 percent. As of June 30, 2011, the actuarial value of assets was \$9.6 billion and the unfunded accrued actuarial liability (“UAAL”) was \$5.7 billion based on the 7.75 percent assumed rate of return. Others changes were made to the ERB’s actuarial assumptions, the most significant of which included: changing the funding method to traditional individual entry age normal; revising post-retirement mortality to reflect slightly longer life expectancy; changing retirement rates at ages 65 and 69 and with 25 or more years of service; decreasing salary increases for members with 10 or more years of service; and decreasing membership growth assumptions. The combined effect of the changes in actuarial assumptions, including to the assumed investment return rate, increased the UAAL by \$426.1 million. The funded ratio (ratio of the actuarial value of assets to actuarial accrued liability) was 65.7 percent at June 30, 2010 based on the 8.0 percent return. Based on the 7.75 percent assumed

rate of return, the estimated funding ratio as of June 30, 2011 is 63.0 percent. If the funded ratio were calculated using the market value of assets rather than the actuarial value, it would have been 63.0 percent as of June 30, 2011. That was an increase from 57.4 percent as of June 30, 2010, based on the 8.0 percent assumed rate of return.

As of June 30, 2011, the UAAL had an infinite amortization period based on the 7.75 percent assumed rate of return. The amortization period for the 2010 actuarial valuation was 62.5 years based on an 8 percent assumed rate of return. The amortization period, also referred to as the funding period, is a calculation based on actuarial models of the period required to amortize the UAAL, assuming ERB's experience exactly follows actuarial assumptions. As required by Governmental Standards Accounting Board ("GASB") Statement 25, the calculation is based on current contribution rates and does not take into account the statutorily scheduled increases in those rates described below.

Member and employer contribution rates are established by State statute. In 2005, the Legislature amended Section 22-11-21 NMSA 1978 to increase the employer contribution rate by 75 basis points (0.75 percent) for each of the seven years beginning July 1, 2005, and to increase member contribution rates by 7.5 basis points (0.075 percent) for each of the four years beginning July 1, 2005. In the 2009 regular legislative session, the Legislature modified employer and member contribution rates for Fiscal Years 2010 and 2011 to shift 1.5 percent of the employer contribution rate to members whose annual salary exceeds \$20,000, resulting in a member contribution rate of 9.4 percent. In the 2011 regular legislative session, the Legislature again modified employer and member contribution rates for Fiscal Year 2012 to extend the 1.5 percent shift and add an additional 1.75 percent shift; for members whose salary exceeds \$20,000, the Fiscal Year 2012 contribution rate is 11.15 percent. In Fiscal Year 2013, the contribution rate for those members will be 9.4 percent, provided that the Secretary of DFA does not issue the certification described above. For those members whose annual salary is \$20,000 or less, the contribution rate remains at 7.9 percent.

In both the 2010 and the 2011 regular legislative sessions, the Legislature also modified employer contribution rates. In Fiscal Years 2010 and 2011, the employer contribution rate for members whose salary is greater than \$20,000 was 10.9 percent. The employer contribution rate for those members is 9.15 percent in Fiscal Year 2012. The employer contribution rate will return to 10.9 percent in Fiscal Year 2013, provided that the Secretary of DFA does not issue the certification described above. The contribution rate for members whose salary is \$20,000 or less is 12.4 percent in Fiscal Years 2010, 2011, 2012, and 2013. In Fiscal Year 2014, the employer contribution rate for all members employed, regardless of salary, will increase to 13.15 percent. Beginning in Fiscal Year 2015, the employer contribution rate will be 13.9 percent for all members employed. As noted above, GASB Statement 25 does not permit the consideration of contribution rates not yet in effect, so the funding period is reported based on the contribution rates actually in effect as of the date that the estimate is made. In addition, New Mexico universities and colleges make an additional contribution of 3 percent of the salary of those employees who elect to participate in the Alternative Retirement Plan ("ARP"), a defined contribution retirement plan available to certain faculty and professional employees, to satisfy the UAAL attributable to participation in the ARP.

ERB pensions are adjusted annually beginning on the later of either July 1 of the year in which a member reaches age 65 or July 1 following the year a member retires. The adjustment is ½ of the CPI percentage increase, except that it will not exceed 4 percent or be less than 2 percent in absolute value. If the absolute value of the CPI percentage increase is less than 2 percent, the adjustment is the same as the CPI percentage increase. Pensions cannot be decreased if there is a decrease in the CPI.

The Public Employees Retirement Association

The Public Employees Retirement Association (“PERA”) had 85,746 members as of June 30, 2011. Cavanaugh Macdonald Consulting, LLC completed an actuarial valuation of the Public Employees Retirement PERA Fund, Judicial Retirement Fund, Magistrate Fund, Legislative Division and Volunteer Firefighter Fund (“VFF”) as of June 30, 2011. In July 2011, the Public Employees Retirement Board accepted the actuary’s revised assumptions that the assets, benefit values, reserves and computed contribution rates reflect utilization of an inflation rate of 3.5 percent per annum, a real rate of return on investment of 7.75 percent and salary increases for longevity and merit at 4.0 percent, each compounded annually. The actuary reviewed other risk assumption changes including mortality, active member withdrawals, disability and retirement rates to allow for expected future experience.

As of June 30, 2011, the total market value of PERA Fund was \$12.1 billion. The June 30, 2011 quarterly PERA total fund investment return was 0.80 percent and the 12 month total fund investment return as of that date was 22.50 percent. The market value of the PERA Fund as of September 30, 2011 declined to \$10.9 billion with an investment return of -10.27 percent for the quarter.

As of June 30, 2011, PERA has an amortization or funding period designated as infinite, based on the employer and member contribution rates in effect as of July 1, 2011. Member and employer rates are established pursuant to Section 10-11-1 through 10-11-141 NMSA 1978. The funded ratio (ratio of the actuarial value of assets to accrued actuarial liability) was 70.5 percent as of June 30, 2011 and the unfunded accrued actuarial liability (UAAL) of the PERA Fund has been calculated to be approximately \$4.97 billion. On a market value basis, PERA’s funded ratio is approximately 70 percent as of June 30, 2011. The PERA Board has reviewed the results of its June 30, 2011 actuarial valuation, which indicates that either additional contributions or benefit reductions will be required in order to properly fund the PERA retirement plans. Because decreased funding criteria within PERA’s Funding Policy was triggered, legislation to increase contribution rates totaling 8 percent over four years for State General, Judicial, Magistrate, Municipal Police and Municipal Fire retirement plans was submitted to the Legislature during the 2011 legislative session. Although this proposed legislation was not adopted, the Legislature is expected to be presented with proposals to address PERA solvency issues in future legislative sessions.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

Actuarial information for each fund as of June 30, 2011 is shown in Table 15.

TABLE 15
Summary of State Retirement Funds Managed by PERA
(Dollars in thousands)

	<u>PERA⁽¹⁾</u>	<u>Judicial</u>	<u>Magistrate</u>	<u>VFF</u>	<u>Legislative</u>
Membership	85,746	253	139	7,259	294
<u>Actuarial Information</u>					
Accrued Liability ⁽²⁾	\$16,826,932	\$139,710	\$55,429	\$ 27,109	\$26,347
Actuarial Value of Assets ⁽³⁾	\$11,855,217	\$ 78,199	\$33,121	\$ 47,005	\$23,508
Unfunded (Overfunded) Accrued Liability	\$ 4,971,175	\$ 61,511	\$22,308	\$(19,896)	\$ 2,839
Present Value of Statutory Obligations	\$20,249,290	\$166,802	\$62,061	\$ 31,055	\$29,221

⁽¹⁾ Includes both the state and municipal divisions.

⁽²⁾ Includes the accrued liability of both the retired and active members.

⁽³⁾ The valuation of assets is based on an actuarial value of assets whereby gains and losses relative to an 7.75 percent annual return are smoothed in over a four-year period.

Source: Public Employees Retirement Association.

Effective July 1, 1992, the Public Employees Retirement Act was amended to provide a fixed annual cost of living adjustment (“COLA”) of 3 percent regardless of inflation or age, beginning two full calendar years after retirement and compounding annually. The COLA is taken into account in the statutory contribution rates of PERA plans. The actuary includes the COLA as part of the normal cost calculation which is the portion of the total contribution rate that pays for the ongoing service credit as opposed to the UAAL. In 1998, the voters amended the State Constitution, adopting Section 22 of Article XX which states that upon meeting the minimum service requirements of an applicable retirement plan created by law for employees of the State or any of its political subdivisions or institutions, a member of a plan shall acquire a vested property right with due process protections under the applicable provisions of the New Mexico and United States Constitutions.

In September 2010, the Retirement System Solvency Task Force (the “Task Force”) received a recent study by Chicago economists that placed New Mexico among 31 states predicted to run out of state pension fund money within the next 16 years. The Task Force also heard from Colorado-based consultants who predicted a decrease in funded ratios, but whose report was not as pessimistic as the report from the Chicago economists.

New Mexico Retiree Health Care Authority

The Retiree Health Care Act was enacted in Sections 10-7C-1 through 10-7C-19 NMSA 1978, for the purpose of providing comprehensive group health insurance coverage for persons who have retired from certain public service positions in the State and their eligible dependents. The New Mexico Retiree Health Care Authority (“NMRHCA”) offers both pre Medicare and Medicare plans, as well as dental, vision and life insurance plans to eligible retirees. There were approximately 50,000 enrolled participants as of October 2011 and approximately 300 participating public entities.

The Retiree Health Care Act provides that the benefits offered to retired public employees may be modified, diminished or extinguished by the Legislature, and that the Act does not create any contract, trust or other rights in public employees to health care benefits.

The NMRHCA, the agency that administers the Retiree Health Care Act, has a revenue base comprised of active employee payroll deductions, participating employer contributions, monthly premium contributions of enrolled participants, investment income, and amounts distributed annually from the Taxation Administration Suspense Fund (“TAA Fund”). Employer and employee contribution rates are established in statute as is the amount distributed from the TAA Fund. Respective employer/employee contribution rates are currently 1.666 percent and 0.833 percent of the participating employee’s salary for Fiscal Year 2011. By July 1, 2012, additional phased in increases will bring the employer contribution to 2 percent and the employee contribution to 1 percent.

As recently as four years ago, the NMRHCA was projected to be insolvent as early as 2014. However, actions taken by the NMRHCA decreasing subsidy levels, increasing premiums and modifying plan designs, coupled with increases in employer/employee contribution rates have extended the NMRHCA’s solvency to 2027.

Based on the GASB Statement 43 valuation for Fiscal Year 2010, and assuming that the NMRHCA Fund is an equivalent arrangement to an irrevocable trust and, hence using a discount rate of 5 percent, the UAAL has been calculated to be approximately \$3.3 billion. As required by GASB Statement 43, this calculation takes into consideration only current assets of the NMRHCA Fund. The NMRHCA continues to look for additional opportunities to further strengthen the financial standing of the NMRHCA including increasing years of service requirements, further plan modifications and increases from all revenue sources. The NMRHCA is developing a five-year solvency plan to ensure the long term financial stability of the program.

The NMRHCA fund as of November 2011 was valued at \$205 million.

FINANCIAL OVERVIEW

State Auditing and Accounting Systems

The financial affairs of every agency in the State are examined and audited each year by the State Auditor, personnel of the State Auditor’s office designated by the State Auditor, or by the independent auditors approved by the State Auditor, as required by Section 12-6-3 NMSA 1978. The audits are conducted in accordance with generally accepted auditing standards. The audit reports include financial statements that are presented in accordance with generally accepted accounting principles.

In July 2006, the State implemented a Statewide Human Resources, Accounting and Management Reporting System (“SHARE System”). The SHARE System replaced the State’s existing central accounting system, central payroll system, personnel system, treasury reconciliation accounting and cashing system, and 114 additional systems then in place at various State agencies. Since June 2007, the State has officially used SHARE as its books of record.

Generally, the transition to SHARE was carried out as expected, however, since Fiscal Year 2007 there have been audit findings of varying severity in the State Treasurer’s audited financial statements related to the timeliness of the book to bank reconciliation. This issue stems from certain SHARE system limitations as well as required improvements to overall SHARE business processes. In the 2009 Legislative session, an appropriation in the amount of \$1.2 million was made to DFA to address some of these issues. The material weakness related to timeliness of the book to bank reconciliation was reduced to a significant deficiency in the State Treasurer’s Fiscal Year 2010 annual

financial statements, and further reduced to a control deficiency in the Fiscal Year 2011 annual financial statements.

State Budgetary and Appropriation Process

All State agencies are required by Section 6-3-19 NMSA 1978 to submit completed budget forms to the DFA Budget Division by September 1 of each year. Guidelines and forms are provided to State agencies in advance of the September 1 deadline. Budget hearings to examine the merits of budget requests are scheduled through the fall and are usually completed by mid December. The DFA Budget Division presents comprehensive budget recommendations to the Governor, as required by Section 6-3-15(B) NMSA 1978.

The Governor is required by Section 6-3-21 NMSA 1978 to submit a budget for the upcoming fiscal year to the Legislature in early January. The Governor's budget includes the executive recommendations for public education; higher education; State agencies; and historical information on prior expenditures, revenues and revenue projections, among other information. The State budget is contained in a General Appropriation Act, which also may contain proposals for supplemental and deficiency appropriations for the current fiscal year.

Upon passage by the Legislature, the Governor may sign the General Appropriation Act, veto it, veto line items or veto parts of it. After the Governor has signed the General Appropriation Act, the DFA Budget Division approves the agency budgets and monitors the expenditure of the funds beginning on July 1, the first day of the fiscal year.

State Treasurer's Investment Responsibilities

Pursuant to Sections 6-10-10(I) through 6-10-10(O) NMSA 1978, the State Treasurer, with the advice and consent of the State Board of Finance, may invest money not immediately needed for government operations. These investment responsibilities are conducted in accordance with the State Treasurer's Investment Policy (the "Investment Policy") which is adopted by the State Treasurer and approved by the State Board of Finance. The Investment Policy states that in keeping with the office's fiduciary responsibility, all investment decisions made by the State Treasurer will adhere to the following three fundamental principles: safety, liquidity and return. The Investment Policy applies to all financial assets of the State invested by the Treasurer in the exercise of the Treasurer's statutory authority or invested for other agencies which have specific investment authority and for which the Treasurer acts as the investing authority. The State Treasurer is the investing authority for the State's general fund, the Local Government Investment Pool, Bond Proceeds Investment Pools, and bond debt service funds.

The State Treasurer's Office invested a portion of the general fund and the State Bond Proceeds Investment Pool in the Reserve Primary Fund ("RPF"), a money market fund, in Fiscal Years 2007 and 2008 respectively. On September 15, 2008, the balance of the general fund's RPF investment was \$448.7 million, and the balance of the State Bond Proceeds Investment Pool's RPF investment was \$311.6 million. On September 16, 2008, the RPF net asset value fell below \$1.00 and holdings in the fund were frozen. Since then, RPF has returned approximately \$0.9904 per share to shareholders. On the recommendations of the independent public accounting firm performing the Fiscal Year 2011 audit of the State Treasury, the remaining positions in the RPF, \$4.33 million of the general fund and \$3.01 million of the State Bond Proceeds Investment Pool, will be written-down before the end of Fiscal Year 2012. Once all pending litigation is settled, the remaining balance of the fund will be distributed, but this final recovery of funds is expected to be quite small.

According to the Investment Policy, an Investment Committee must be appointed by the State Treasurer with the specific purpose and responsibility of establishing, maintaining and administering the Investment Policy. The Investment Committee consists of five voting members: the State Treasurer, or designee; the State Treasurer's Chief Investment Officer (with the State Cash Manager as an alternate), who serves as Investment Committee Chair; the Director of the State Board of Finance or designee; and two additional members. These additional members must be participants in the private investment community or have expert knowledge or professional experience in public finance or public fund investing. One member is appointed by the State Treasurer and approved by the Board and one member is appointed by the Board and approved by the State Treasurer.

The Investment Committee is charged with the following responsibilities:

- Reviewing the Investment Policy, no less than annually, and recommending, if advisable, modifications in the Investment Policy from time to time;
- Assessing, no less than annually, the utility and efficacy of established internal controls as loss prevention measures with respect to the investment portfolio;
- Determining, no less than annually, whether legislation affecting the investment activities of the State Treasurer should be recommended;
- Recommending investment procedures that may be useful or required in maintaining currency with public money investment practices;
- Deliberating on such topics as economic outlook, portfolio diversification and maturity structure, potential risks, the target rate of return on the investment portfolio;
- Identifying potential violations of and suggesting remedial actions to achieve conformity with the Investment Policy;
- Recommending, no less than annually, action on depositories, custodians, broker/dealers and investment managers and advisors; and
- Assessing whether the Investment Policy is being properly implemented by the individuals and entities involved in the administration and management of investment activities.

In addition to Investment Committee oversight and recommendations, the State Treasurer contracts with an independent investment advisor to provide guidance and advice on investments, market conditions and benchmarks. The investment advisor provides quarterly performance reports on all of the State Treasurer's portfolios and information relating to the economic outlook and market trends.

General Fund

The State derives the majority of its recurring General Fund revenue from four major sources: general and selective sales taxes, income taxes, taxes and royalties on natural resource production, and investment earnings both on its two permanent funds and on cash balances.

Table 16 lists audited revenues, expenditures and ending fund balances for Fiscal Years 2009 through 2011, as well as projections for results for Fiscal Years 2012 and 2013.

NOTES TO GENERAL FUND FINANCIAL SUMMARY:

(1) Appropriation Account, Nonrecurring Appropriations:

FY09 includes the following appropriations from Laws 2008: \$18.1 million for special appropriations from the General Appropriation Act of 2008 (Chapter 3), less \$5.2 million in information technology contingent appropriations not certified by CIO in FY09; \$0.5 million from HB140 for Soil and Water Districts (Chapter 78); \$8.4 million from SB 165 "Junior" (Chapter 6); \$1.5 million from SB 471 (Chapter 92), less \$0.5 million in contingencies that did not materialize; and \$45.8 million for various projects (2nd Special Session, Chapters 3, 5-8 and 10). **FY09 includes the following appropriations from Laws 2009:** -\$1.0 million from HB 9 (Chapter 5); -\$161.0 million from HB 10 (Chapter 2), -\$27.1 million from Sections 1 and of SB79 (Chapter 3); and \$40.4 million from the General Appropriation Act of 2009 (Chapter 124, Sections 5 and 6).

FY10 includes the following appropriations from Laws 2008: \$5.2 million in information technology appropriations transferred from FY09 (Chapter 3); and \$0.5 million in capital outlay appropriations transferred from FY09 (Chapter 92). The contingencies for these appropriations did not materialize during FY09.

FY10 includes the following appropriations from Laws 2009: \$100 million transferred to various funds (Laws 2009, Chapter 124, Section 12); -\$1.2 million in reductions to appropriations made in Section 5 of the General Appropriation Act of 2009 (1st Special Session, Chapter 2); \$3 million for public school supplemental funding (1st Special Session, Chapter 5); and -\$20.15 million in reductions of appropriations made by Laws 2009 (1st Special Session, Chapter 7, SB 28).

FY10 includes the following appropriations from Laws 2010: \$-0.2 million in reductions of appropriations made by Laws 2009 (Chapter 105); \$5.0 million for development training funds (Chapter 79); \$0.5 million from Section 5 of the General Appropriation Act of 2010 (2nd special session, Chapter 3); and \$0.5 million for the temporary tax amnesty program (2nd special session, Chapter 2).

FY11 includes the following appropriations from Laws 2010: \$1.1 million from Section 5 of the General Appropriation Act of 2010 (2nd Special Session, Chapter 3), \$1.5 million for the 2011 redistricting session (Laws 2011, Chapter 1), and \$15.6 million from Section 5 and Section 6 of the General Appropriation Act of 2011 (Chapter 179).

FY12 includes the following appropriations from Laws 2011: \$1.3 million for the 2011 1st Special Session (Chapter 1), \$0.5 million for Medicaid and SNAP (1st Special Session, Chapter 2), and \$4 million appropriated for police vehicles (1st Special Session, Chapter 5).

(2) General Fund Operating Reserve Appropriations:

FY09 includes \$1.4 million for State Board of Finance Emergency Fund.

FY10 includes \$1.2 million for State Board of Finance Emergency Fund.

FY11 includes \$0.3 million for State Board of Finance Emergency Fund.

(3) Year-ending Balances in the Operating Reserve:

Annually, if the balance in the General Fund Operating Reserve exceeds 8% of the previous year's recurring appropriations, the excess over 8% is transferred to the Tax Stabilization Reserve.

(4) Appropriation Contingency Fund Appropriations:

FY09 includes the following appropriations from Laws 2008: \$11.2 million for disaster allotments; \$0.5 million contingency to the Economic Development Department for the X-Prize (Chapter 3, Section 5, Item 51); \$12.6 million contingency for the Public Education Department (Chapter 3, Section 5, Item 98); and \$1.7 million contingency appropriation transferred from FY08 to FY09 for an unexpended appropriation from education reform for a Public Education Department information technology system (Chapter 3).

FY09 includes the following appropriations from Laws 2009: \$35.8 million for the State Equalization Guarantee (Chapter 3, Section 9); and \$12.6 million for education reform appropriations from the General Appropriation Act of 2009 (Chapter 124, Section 5, Items 57-60 and 63).

FY10 includes the following appropriations/transfers from Laws 2009: \$9.9 million for disaster allotments; \$25.0 million transferred from the general fund for general purposes (Chapter 124); and \$40.0 million transferred from the Appropriation Account for education reform (Chapter 124).

FY10 includes the following appropriations/transfers from Laws 2010: \$6.0 million for education reform appropriations from the General Appropriation Act of 2010 (2nd Special Session, Chapter 6, Section 5, Item 17).

FY11 includes the following appropriations/transfers from Laws 2010: \$28.8 million for disaster allotments; \$4.0 million for education reform appropriations from the General Appropriation Act of 2010 (2nd Special Session, Chapter 6, Section 5, Item 16); \$2 million for emergency support to public schools, and \$2.5 million for the governor's educational reform initiatives.

(5) Year-ending Balances in the Tax Stabilization Reserve:

Annually, if the balance in the Tax Stabilization Reserve exceeds 6.0% of the previous year's recurring appropriations, the excess over 6% is transferred to the Taxpayer's Dividend Fund.

FY09 includes \$55.7 million transfer from the Tax Stabilization Reserve into the Appropriation Account (Laws 2009, Chapter 3).

FY10 includes \$115.0 million transferred from the Tax Stabilization Reserve into the Appropriation Account (1st Special Session, Laws 2009, Chapter 3); and \$57.6 million transferred from the Tax Stabilization Reserve into the Appropriation Account (2nd Special Session, Laws 2010, Chapter 6, Section 15).

(6) Tobacco Settlement Permanent Fund Reserve (established by Laws 2003, Chapter 312).

FY09 -- A total of \$48.9 million, an additional \$24.4 million, was transferred from the Tobacco Settlement Permanent Fund to the Tobacco Settlement Program Fund for Medicaid (Laws 2009, Chapter 3).

FY10 -- A total of \$41.0 million, an additional \$20.5 million, was transferred from the Tobacco Settlement Permanent Fund to the Tobacco Settlement Program Fund for Medicaid (Laws 2009, Chapter 3).

FY11 -- A total of \$38.6 million, an additional \$19.3 million, was transferred from the Tobacco Settlement Permanent Fund to the Tobacco Settlement Program Fund for Medicaid (Laws 2010, Chapter 49).

FY12 -- A total of \$38.6 million, an additional \$19.3 million is estimated to be transferred from the Tobacco Settlement Permanent Fund to the Tobacco Settlement Program Fund for Medicaid (Laws 2011, Chapter 3).

Review of Results and Projections in the General Fund

Fiscal Year 2009. Recurring General Fund revenues decreased by 11.6 percent from the previous fiscal year to approximately \$5.3 billion in Fiscal Year 2009. The price of oil averaged \$64.71 per barrel and the price of natural gas averaged \$5.65 per mcf for the fiscal year. General and selective sales taxes declined by 0.7 percent while income taxes decreased by 28.5 percent. General Fund balances decreased by \$346.5 million to \$388.6 million, or 6.4 percent of Fiscal Year 2009 recurring appropriations.

In addition to legislative actions taken during the 2009 regular legislative session, the executive branch continues to implement a partial hiring freeze as well as other austerity measures such as freezing salary increases, eliminating non-essential overtime, limiting upward reclassification of postings, suspending awards of compensatory time for exempt employees, reducing expenses related to travel, equipment, supplies and furniture and employing energy conservation strategies. The Governor also requested elected public officials and the legislative and judicial branches to contribute to the overall effort to reduce expenditures.

The 2009 Legislature adopted and the Governor signed four bills revising the Fiscal Year 2009 budget. Laws 2009, Chapter 5 (House Bill 9) cancelled the authorization for various capital outlay projects that were previously appropriated from the General Fund and Severance Tax bond funds and reauthorized certain other projects. Laws 2009, Chapter 2 (House Bill 10) provided for a 2.5 percent reduction in certain General Fund operating budgets for Fiscal Year 2009, and other appropriations, with variations and exemptions for certain agencies and programs. Laws 2009, Chapter 3 (Senate Bill 79) reduced and repealed General Fund appropriations and authorized transfers to the General Fund from several other funds. This bill also partially restored reductions to public schools and Medicaid with appropriations from two reserve funds. The bill appropriated \$35.8 million from the Appropriation Contingency Fund's education reform balance to diminish the public schools budget reduction from 2.5 percent to 1.1 percent, and appropriated \$22.6 million from the Tobacco Settlement Permanent Fund to diminish the Medicaid budget reduction from 2.5 percent to 1 percent. Laws 2009, Chapter 4 (Senate Bill 80) restored the requirement that was inadvertently deleted in 2003 legislation for a first quarterly installment of corporate estimated income tax, causing some corporate income tax revenue to arrive during Fiscal Year 2009 instead of Fiscal Year 2010. Lastly, the executive branch implemented an initiative to sell certain stocks held in unclaimed property. As a result of this initiative, \$7.9 million in proceeds were transferred to the General Fund. Finally, a measure was enacted in the special session of the Legislature in October 2009 that authorized the Department of Finance and Administration to transfer funds from the General Fund Operating Reserve to the Appropriation Account.

Fiscal Year 2010. Recurring general fund revenues were \$4.80 billion in Fiscal Year 2010. The price of oil realized in New Mexico averaged \$71.29 per barrel and the price of natural gas averaged \$5.20 per mcf for Fiscal Year 2010.

General and selective sales taxes declined by 10.8 percent from Fiscal Year 2009 to Fiscal Year 2010, while personal income taxes decreased by 0.2 percent. Corporate income taxes fell by 23.0 percent in Fiscal Year 2010. Mineral production taxes declined by 11.2 percent from Fiscal Year 2009, while rents and royalties declined by 22.2 percent, although oil and natural gas prices recovered substantially in Fiscal Year 2010.

Fiscal Year 2010 also included \$479.9 million of non-recurring revenues. In addition, as the result of solvency measures, including actions taken in the 2009 1st special, 2010 regular and 2010 2nd special sessions of the Legislature and expenditure reductions mandated of executive branch agencies by Executive Order 2009-044, \$172.6 million was transferred to the Appropriation Account from the Tax Stabilization Reserve Fund. The legislative sessions and executive order actions include reductions to operating budget and capital appropriations, expenditures, including furloughs, transfers of certain fund

balances to the general fund, and use of federal American Recovery and Reinvestment Act of 2009 (“ARRA”) funds. In addition to this nonrecurring general fund revenue, New Mexico received over \$2 billion in federal stimulus funding from ARRA for use in Fiscal Years 2009 through 2011. New Mexico’s share of the federal funding contained in ARRA for Fiscal Years 2009 through 2011 includes \$536.0 million for Medicaid, \$260.4 million for education, and \$57.9 million for general purposes. New Mexico received additional federal funding in August 2010 that provided a one-time payment of \$65 million for education and \$126 million for Medicaid to avoid states’ revenue shortfalls across the nation.

The Fiscal Year 2010 general fund budget, enacted in the 2009 regular session and further adjusted during the October 2009 special session of the Legislature, contained \$5.36 billion of recurring appropriations, a decrease of 11.2 percent over the Fiscal Year 2009 adjusted budget. The budget was balanced using \$406.2 million (\$180.5 for Medicaid and \$225.7 for Education Stabilization) in ARRA funding to avoid significant reductions in public and higher education and Medicaid, temporarily substituting \$28.1 million of State Medicaid funding with annual tobacco settlement payments, shifting 1.5 percent of annual State pension contributions from the employer to employees to save \$42.6 million, reducing State agency, public education, and higher education budgets by \$139 million, mandating expenditure reductions to save \$79 million in general fund expenditures, implementing furloughs to save \$8.6 million in general fund expenditures and shifting funding sources or cancelling \$271.1 million in capital outlay projects. General fund reserves were \$278.1 million at the end of Fiscal Year 2010, 5.2 percent of current-year recurring appropriations.

Fiscal Year 2011. In Fiscal Year 2011, recurring general fund revenues increased by 12.7 percent to approximately \$5.4 billion on a year-over-year basis. The price of oil averaged \$84.60 per barrel and the price of natural gas averaged \$5.50 per mcf in Fiscal Year 2011. General and selective sales taxes increased by 11.5 and 18.3 percent, respectively, reflecting an increase in the statewide gross receipts tax and the compensating tax from 5 to 5.125 percent that took effect on July 1, 2010, closure of a compensating tax loophole relating to the applicability of compensating tax to sellers with no nexus to the state, and an increase in the cigarette tax rate of \$0.75 per package of cigarettes. Income taxes increased by 19.3 percent, including the impact of eliminating a deduction for state and local taxes paid. Mineral production taxes in Fiscal Year 2011 increased by 8.5 percent from Fiscal Year 2010 and rents and royalties increased by 12.9 percent. General fund balances are expected to close at \$500.7 million at the end of Fiscal Year 2011, 9.6 percent of current-year recurring appropriations. During the 2010 Legislative Session, the Legislature mandated the Governor to proportionately reduce allotments to all general funded entities, excluding most Medicaid programs to ensure solvency in Fiscal Year 2011. As a result of the July 2010 revenue estimate, one allotment reduction in the amount of 3.2 percent was implemented for most programs on September 1, 2010. Additionally, the Governor requested state agencies reduce expenditures which resulted in an increase in general and other fund reversions and an increase of reserve balances.

Fiscal Year 2012. Based on the consensus revenue group projections for Fiscal Year 2012 made in December 2011, recurring general fund revenues are projected to increase by approximately 2.4 percent or \$130.4 million over Fiscal Year 2011. The Fiscal Year 2012 budget contains approximately \$5.4 billion of recurring appropriations. Among the measures taken to balance the budget were decreasing the fire protection fund distribution by \$1.3 million, reducing the film tax credit by \$23.3 million, shifting an additional 1.75 percent of annual State pension contributions from employer to employees to save \$49.7 million, improving the system for payment of unemployment insurance by State agencies resulting in cost savings of \$3 million, and implementing government efficiencies to save \$2.5 million. General fund reserves are projected to be \$600.2 million at fiscal year end, approximately 11.0 percent of current-year recurring appropriations for Fiscal Year 2012. This amount may be reduced by potential supplemental, special, deficiency and internet technology appropriations during the 2012 legislative session. The Governor has expressed goals of maintaining reserves of 10 percent in future fiscal years, and providing for five-year expenditure forecasts to accompany consensus revenue forecasts.

The consensus revenue group will produce another revenue forecast prior to presentation by the Legislature of its final budget proposal for review by the Governor.

Fiscal Year 2013. Based on the consensus revenue group projections for Fiscal Year 2013 made in December 2011, recurring general fund revenues are projected to increase by approximately 2.8 percent over Fiscal Year 2012. Total recurring revenue is estimated to be approximately \$5.7 billion. Much of the anticipated growth is in personal and corporate income taxes, which are estimated to grow by 6.4 percent collectively, and mineral resources taxes, which are projected to grow by 4.9 percent. Additional growth is expected in general sales taxes, which are projected to grow by 3.8 percent. Interest earnings are projected to fall by 4.8 percent, primarily due to the constitutionally mandated reduction in distributions from the land grant permanent fund from 5.8 percent of 5-year average market value to 5.5 percent beginning in Fiscal Year 2013.

Fiscal Year 2013 “new money”, defined as Fiscal Year 2013 recurring revenue less Fiscal Year 2012 recurring appropriations, is estimated to be \$253 million. Having met certain revenue triggers, including a reserve level above 5 percent of appropriations and a December 2011 revenue estimate reflecting Fiscal Year 2012 revenues \$100 million above the Fiscal Year 2012 appropriation, the retirement swap passed during the 2011 regular session is expected to be reversed in Fiscal Year 2013. After reversal of the retirement swap, new money is estimated to be approximately \$200 million. The Governor has expressed goals of setting aside a portion of new money to implement tax reform.

General Fund Taxes and Revenues

Programs and operations of the State are predominantly funded through a system of 28 major taxes, and a substantial number of minor taxes, administered by the Taxation and Revenue Department. The Public Regulation Commission collects taxes on insurance premiums. The Regulation and Licensing Department collects professional licensing fees and a number of charges for regulating activities and professions in the state. In addition, interest income and earnings from the Land Grant Permanent Fund, the Severance Tax Permanent Fund and cash balances invested by the State Treasurers Office provide important sources of revenue for State purposes. The most important tax and revenue sources, as measured by magnitude of revenue generation, and the application of the monies to certain funds and purposes, are described below.

Gross Receipts and Compensating Taxes

The gross receipts tax is levied on the total amount of money or the value of other consideration received from selling tangible and certain intangible personal property in the State, from leasing property employed in the State, from performing services in the State and from research and development services performed outside the State on products initially used in the State. The tax is remitted by the seller but generally passed on to the purchaser. The compensating tax is imposed generally on property used in the State but purchased elsewhere. Gross receipts and compensating taxes are due on the 25th day of the month following the month in which the transaction occurs.

The general presumption is that all receipts of a person engaging in business are subject to the gross receipts tax, even though there are over 100 specified exemptions and deductions from gross receipts taxation. Exemptions from the gross receipts tax include, but are not limited to, certain receipts of governmental agencies and certain non-profit organizations; receipts from the sale of certain vehicles; occasional sales of property or services; wages; certain agricultural products; and dividends, interest and receipts from natural gas, oil or mineral interests sales or leases. Deductions from the gross receipts tax include, but are not limited to, receipts from various types of sales or leases of tangible personal property

or service; receipts from certain sales of property to governmental agencies or to certain non-profit organizations; receipts from certain processing of some agricultural products; receipts from certain publication sales; certain receipts from interstate commerce transactions; and as set forth below, certain food and medical services as of January 1, 2005.

The gross receipts and compensating taxes are together the single largest source of State General Fund revenue. The gross receipts tax is also a significant source of revenue for cities and counties. The gross receipts tax includes the 5.125 percent statewide gross receipts tax levy, plus several city and county local-option gross receipts taxes. The statewide gross receipts tax rate was increased from 5 to 5.125 percent effective July 1, 2010 as a result of action taken during the 2010 special legislative session. Until January 1, 2005, a credit of 0.5 percent against the statewide rate of 5 percent was allowed for transactions taking place in municipalities. Receipts from the statewide gross receipts tax levy, less certain disbursements, are deposited in the State General Fund. The disbursements include 1.225 percent of the taxable gross receipts reported in each incorporated municipality to that municipality. The State Aviation Fund receives a monthly distribution equal to 4.79 percent of the reported value of jet fuel sales, and a statutory monthly distribution which increased from \$167,000 to \$250,000 in July 2009 as specified in Section 7-1-6.7 (D) NMSA 1978. An additional \$530,000 is currently distributed monthly to the New Mexico Finance Authority's State Building Fund Bonding Fund, pursuant to Section 7-1-6.42 NMSA 1978. Pursuant to legislation enacted in 2009, that distribution to the State Building Bonding Fund will increase to \$680,000 per month on the later of July 1, 2011 or upon certification that the increased distribution is needed to make debt service payments on bonds issued pursuant to Section 7-1-6.42 for construction of a new executive office building near the State Capitol in Santa Fe. The County Equalization Distribution is made annually from state gross receipts tax revenues; it has averaged \$13.5 million over the past five years. After all other distributions, the General Fund share of gross receipts tax collections was 55 percent in Fiscal Year 2010, almost 58 percent in Fiscal Year 2011 after the statewide rate increase and is expected to be slightly more than 58 percent for subsequent years. Receipts from the compensating tax, less distributions, are transferred to the state General Fund. Compensating tax distributions include 10 percent to the small cities assistance fund and 10 percent to the small counties assistance fund, and a distribution to municipalities based on the level of their taxable gross receipts.

In 2005, the Legislature made a number of changes to the state gross receipts tax laws in Sections 7-1-6.16, 7-1-6.46, 7-1-6.47, 7-9-92 and 7-9-93 NMSA 1978. The credit of 0.5 percent granted to municipalities against the statewide rate was eliminated. The tax on food and certain medical services also was eliminated. The legislation created a deduction for gross receipts tax from retail sales of food as defined for federal food stamp program purposes. Retailers are required to report receipts from sales of groceries and then claim a deduction for the receipts. The deduction does not apply to receipts of restaurants or sales of prepared foods. The legislation also created a gross receipts tax deduction for some receipts of licensed health care providers (broadly defined) from Medicare Part C and managed health care plans, and health care insurers. This medical deduction was modestly expanded in the 2007 legislative session. The 2005 legislation also provided for payments from the State to reimburse local governments for all lost gross receipts tax revenues due to these deductions. Legislation in 2007 froze the rate, but not the size, of these payments for counties with a population over 48,000, and municipalities with a population greater than 10,000 or greater than average per capita taxable gross receipts.

In June 2008, the New Mexico Court of Appeals decided a tax dispute case, *Dell Catalog Sales L.P. v. Taxation and Revenue Dep't*, No. 26,843, which could impact the collection of New Mexico gross receipts and compensating taxes from businesses conducting commerce across jurisdictional lines by creating uncertainty regarding which jurisdiction's taxes are imposed and collected. The New Mexico Supreme Court declined to hear the case, as did the United States Supreme Court.

In Fiscal Year 2011, total distributions to the General Fund from gross receipts and compensating taxes increased by 11.5 percent over the previous fiscal year to \$1.9 billion, comprising 35.0 percent of recurring General Fund revenue.

Personal Income Tax

The personal income tax is imposed on the net income of every individual resident and upon the net income from business, property, or employment of individual nonresidents. Collections, net of refunds, are deposited in the General Fund. State taxable income is generally equal to federal adjusted gross income less deductions and amounts not taxable by State or federal laws. The State allows deductions for income earned by Indians on reservations, graduated deductions for income earned by taxpayers 65 years or older, and deductions for low- and middle-income taxpayers.

New Mexico's personal income tax structure has changed significantly in recent years, starting in 2003. The Legislature enacted significant personal income tax reductions that reduced the top marginal personal income tax rate from 8.2 percent in 2002 to 4.9 percent by 2008, codified in Section 7-2-7 NMSA 1978. This law combined the Head of Household filers' tax rate with the Married, Joint and Surviving Spouse filers' tax rate, beginning in 2006. Single parents are now taxed at the same rate as married couples. Statutory changes enacted in 2005 also provided low and middle-income tax exemptions, a personal income tax exemption for medical expenses, incentives to encourage business formation in rural areas, and incentives to encourage renewable energy production in the State.

In the 2011 Fiscal Year, total distributions to the General Fund from personal income tax increased by 11.5 percent over the previous fiscal year to \$1.1 billion, and generated 19.6 percent of total recurring General Fund revenue.

State tax rates by filing status effective Calendar Years 2011 and 2012 are set forth below:

If the taxable income is:	Married Filing Separate:	If the taxable income is:	Surviving Spouse, Married Filing Joint and Head of Household
Not over \$4,000	1.7% of taxable income	Not over \$8,000	1.7% of taxable income
\$4,001 to \$8,000	\$68.00 plus 3.2% of excess over \$4,000	\$8,001 to \$16,000	\$136.00 plus 3.2% of excess over \$8,000
\$8,001 to \$12,000	\$196.00 plus 4.7% of excess over \$8,000	\$16,001 to \$24,000	\$392.00 plus 4.7% of excess over \$16,000
Over \$12,000	\$384.00 plus 4.9% of excess over \$12,000	Over \$24,000	\$768.00 plus 4.9% of excess over \$24,000
If the taxable income is:	Single Including Trust and Estates:		
Not over \$5,500	1.7% of taxable income		
\$5,501 to \$11,000	\$93.50 plus 3.2% of excess over \$5,500		
\$11,001 to \$16,000	\$269.50 plus 4.7% of excess over \$11,000		
Over \$16,000	\$504.50 plus 4.9% of excess over \$16,000		

Corporate Income Tax

The corporate income tax is imposed on the net income of a corporation doing business in the State or deriving any income from property or employment in the State by Section 7-2A-3 NMSA 1978. Collections, net of refunds, are transferred to the General Fund. Corporations are required to file a return on or before the 15th day of the third month following the end of each taxable year at which time

corporate income taxes are also due. A corporation is required to make estimated tax payments if the tax, net of credits, is \$5,000 or more. Insurance companies do not pay corporate income tax; rather, they pay a tax on insurance premiums. Nonprofit organizations and retirement trust funds do not pay corporate income tax.

Tax rates are established under a graduated table and range from 4.8 percent on the first \$500,000 or less of taxable income to 7.6 percent on income in excess of \$1,000,000. Based upon revenue results for the 2011 Fiscal Year, total distributions to the General Fund of net receipts from corporate income taxes totaled \$229.8 million. This is an increase of 83.7 percent from the prior fiscal year and generated 4.3 percent of recurring General Fund revenue.

In recent years, a number of credits administered through the corporate income tax system have been enacted. These include: the film production credit, enacted pursuant to Section 7-2F-1 NMSA 1978; the real property tax credit, enacted pursuant to Section 7-2-18.10 NMSA 1978; the rural jobs tax credit, enacted pursuant to Section 7-2E-1 NMSA 1978; the biodiesel production and sale credit, enacted pursuant Section 7-2-18.21 NMSA 1978; the agricultural water conservation tax credit, enacted pursuant to 7-2-18.20 NMSA 1978; the sustainable building tax credit, enacted pursuant to Section 7-2-18.19 NMSA 1978; and the renewable energy production tax credit, enacted pursuant to Section 7-2A-19 NMSA 1978. The 2011 Legislature placed a cap of \$50 million per year on the film production tax credit. Credit claim amounts may be paid over a period of up to two years.

Mineral Production Taxes

Mineral production taxes (Resource Excise Tax, Natural Gas Processors Tax, Oil and Gas Conservation Tax, and Oil and Gas Emergency School Tax) are levied on producers and others on the value of severed minerals and material resources from within the State and these taxes are disbursed to the General Fund. The Oil and Gas Emergency School Tax is imposed for the privilege of engaging in the business of severing oil, natural gas, liquid hydrocarbons and CO₂ from the soil of the State. The Oil and Gas Emergency School Tax is imposed at a rate of 3.15 percent of taxable value of oil and 4 percent of taxable value for natural gas. Taxable value reflects gross sales value less deductions for royalties paid to government entities and for certain processing and transportation expenses. The same definition of taxable value is used for calculation of oil and gas severance tax liability.

In the 2011 Fiscal Year, distributions to the General Fund from Oil and Gas Emergency School Tax receipts totaled \$376.1 million. This represents a 15.9 percent increase from the prior fiscal year. Other General Fund taxes on natural resource production totaled \$47.7 million. For Fiscal Year 2011, mineral production taxes contributed 7.8 percent of recurring General Fund revenue.

In 2002, the Legislature created the Jicarilla Apache Tribal Capital Improvement Tax Credit, codified in Section 7-31-27 NMSA 1978. This tax credit can reduce the Oil and Gas Emergency School Tax on products severed from wells drilled on the Jicarilla Apache Nation by up to 0.7 percent of the taxable value of production. This credit totaled \$1.1 million for Fiscal Year 2011.

Royalties, Rents and Bonuses

Federal Lands. Under terms of the 1920 Federal Mineral Leasing Act, the State receives 50 percent of all income generated from leasing federal lands located in the State for mineral production. Principal sources of income are royalty payments on oil and natural gas production. Additional income is derived from bonus payments for oil and natural gas leases and royalty payments on production of coal, potash and other minerals. The U.S. Minerals Management Service collects federal mineral lease income

and deducts the State's share of administrative costs. The State receives payments on a monthly basis and makes deposits to the General Fund. Based upon preliminary revenue results for the 2011 Fiscal Year, total distributions to the General Fund from federal mineral leases totaled \$411.8 million. This equals 7.6 percent of recurring General Fund receipts for the fiscal year.

Federal Fiscal Year 2009 appropriations bills implemented a 2 percent administrative fee cut from the federal royalty payments to states. However, this 2 percent fee cut was restored in the Federal Fiscal Year 2010 appropriations bills. Approximately \$10.3 million was deducted from the federal mineral leasing payments to the State for Fiscal Year 2009 and \$7.2 million was deducted in Fiscal Year 2010. In Fiscal Year 2011, approximately \$8.4 million was deducted from the federal mineral leasing payments.

State Lands. The State Land Office manages lands acquired by the State under the federal Fergusson Act enacted prior to statehood, as well as under the State Constitution. All income from State lands is dedicated to specific educational purposes and institutions. As with federal lands, the oil and natural gas industry is the principal source of revenue from State lands. Bonus income is also collected in the form of cash payments as a result of competitive bidding for State leases. Rentals and bonus income are distributed to the respective beneficiary institutions. The largest beneficiary group is the State's public school system. Mineral production from State trust lands also generates royalty income which is deposited in the State Land Grant Permanent Fund ("LGPF"). Royalties are imposed on most mineral production values at the rate of 12.5 percent, although there is a provision for rates of up to 20 percent for new leases on developed acreage. LGPF beneficiaries and "State lands" beneficiaries are the same: educational institutions and public schools. In Fiscal Year 2011, distributions to the General Fund from the State Land Office totaled \$65.6 million, which equaled 1.2 percent of recurring General Fund receipts for the fiscal year.

In Fiscal Year 2012, the State Land Office allowed mineral leasing of lands previously unavailable for oil and natural gas production due to potash mining at shallower depths. With technological improvements in drilling, including the combination of horizontal drilling and hydraulic fracturing, these deposits were made accessible without inhibiting potash mining. As a result, the State Land Office benefitted from several months of record lease bonus payments. The additional revenue generated from these leases is estimated to be about \$20 million in Fiscal Year 2012, but is not expected to recur in subsequent fiscal years.

Severance Tax Permanent Fund and the Land Grant Permanent Fund

The Severance Tax Permanent Fund ("STPF") was established in the State Treasury in 1973 to receive the residual revenues from the Bonding Fund and serve as an endowment for future capital projects. In 1976, the electorate approved a constitutional amendment giving the STPF constitutional status. In 1982, the electorate approved a second constitutional amendment that removed the discretionary power of the Legislature to appropriate funds from the corpus of the STPF, thereby creating a permanent endowment fund. Distributions from investments of the STPF, however, may be appropriated by the Legislature in the same manner as other general revenues are appropriated. Severance tax receipts have been the primary source of funding for the STPF. The State Investment Officer under the direction of the State Investment Council ("SIC") invests the corpus and non-appropriated income of the STPF. The market value of the STPF as of June 30, 2011 was approximately \$3.9 billion, an increase of approximately 22.6 percent from the prior Fiscal Year. Performance for the one year period ended June 30, 2011 was 2.3 percent below the Fund benchmark, and underperformance for the quarter ended June 30, 2011 was 0.6 percent below the fund policy index. Funds on deposit in the STPF are not pledged to and may not be used to pay any Bonds.

The Land Grant Permanent Fund (“LGPF”) is designed solely to benefit the public educational system of the State and other specified institutions. The origins of the LGPF are found in the federal Fergusson Act of 1898, which granted two sections of land in every township for the benefit of the public schools in the territories of New Mexico. Also under this Act, specific acreage was granted to individual education, medical and penal institutions in the territory. The initial grant totaled in excess of 5.5 million acres. In 1910, the Enabling Act granted additional lands to various beneficiaries in New Mexico, including the public schools, which received the largest share. This brought the total lands placed in trust for the common school system and other beneficiaries to over 13 million acres. Over the years, some land has been sold (and the proceeds used to increase the corpus of the LGPF), so the current total is nine million surface acres and 13.4 million subsurface acres.

Pursuant to Section 19-1-1 NMSA 1978, the State Land Office is charged with the custody and disposition of the land granted to the State. The Commissioner of Public Lands sells or leases these properties in accordance with the provisions of the appropriate statutes. The State Investment Officer under the direction of the SIC invests the corpus and income of the LGPF. As of June 30, 2011, the market value of the LGPF was approximately \$10.69 billion, an increase of approximately 22.4 percent over the prior fiscal year. Performance for the year ended June 30, 2011 trailed its benchmark by 2.6 percent, while investment returns for the quarter were 0.8 percent below the LGPF’s policy index. The corpus of the LGPF is constitutionally protected from appropriation and LGPF assets are not pledged to and may not be used to pay debt. The LGPF is also protected by the Federal Enabling Act of 1910.

In November 1996, the State electorate approved a constitutional amendment regarding distributions from both of the State’s permanent funds. Distributions are now calculated on a total return basis rather than assuming an income distribution method. In addition, distributions to beneficiaries are now based on a formula under which a statutorily specified percentage of the previous average five-year market value of the fund is distributed.

In September 2003, the State electorate approved a constitutional amendment increasing the rate of distribution from the LGPF from the previous 4.7 percent to a new base distribution of 5 percent of the LGPF’s five-year average market value beginning in Fiscal Year 2005. Certain additional distributions shall be made to implement and maintain educational reforms as provided by law. An additional 0.8 percent has been and will be distributed in Fiscal Years 2005 through 2012 and an additional 0.5 percent will be distributed in Fiscal Years 2013 through 2016. A three-fifths majority of each house of the Legislature may suspend this additional distribution.

In May 2009 in connection with an ongoing investigation undertaken by the New York Attorney General relating to the use of third party placement agents in connection with investment transactions of that state’s retirement fund, Saul Meyer, the founding partner of Aldus Equity Partners (“Aldus”), an investment advisor to that fund, was indicted in New York for allegedly paying illegal kickbacks in connection with investment recommendations to that fund. Aldus had acted as an investment advisor to the SIC and ERB on private equity investments until being terminated shortly after the May 2009 indictment of Mr. Meyer. In October 2009, Mr. Meyer pled guilty to a fraud charge relating to investments made by the New York retirement fund and recommended by Aldus. In connection with that plea, Mr. Meyer stated that from 2004 to 2009 Aldus had acted as an advisor to the SIC and the ERB and that, contrary to his fiduciary responsibilities to the SIC and ERB, he ensured that Aldus recommended certain proposed investments pushed on him by politically connected individuals or their associates who stood to benefit financially or politically from the investments, and that the investments were not necessarily in the best interests of the State. Several days later in October 2009, Gary Bland, the State Investment Officer, resigned. Mr. Meyer has not yet been sentenced. To date, no criminal charges have been filed by state or federal investigators in New Mexico, but their work is believed to be ongoing. In line with new statutory authority, in May 2011, the SIC in conjunction with the Day Pitney Law Firm and New Mexico Attorney General, filed the first of what is expected to be several recovery lawsuits against more than a dozen placement agents, former Investment Officer Bland, and other individuals, alleging

that these individuals improperly benefited from pay-to-play and kickback schemes involving SIC investments.

In response to these and other events and the negative returns suffered by the State's various investment funds during the market turmoil associated with the downturn in the nation's economy in 2008 and 2009, the Board and the Legislative Council Service ("LCS") co-sponsored an Independent Fiduciary and Operational Review of State Investment Policies, Procedures and Practices prepared by Ennis, Knupp & Associates, Inc. (the "Review"). The scope of the work of this Review included, among other things, review and recommendations for appropriate governance and organizational structure, investment best practices for investing agencies regarding the use of and payment of third party marketer fees. The findings and recommendations of the Review were reported to the Board at a meeting on January 13, 2010. In order to address certain recommendations of the Review, during the 2010 legislative session the Legislature, among other things, modified the composition of the SIC, clarified the authority of the SIC and the State Investment Officer, provided for the appointment of the State Investment Officer by the SIC and changed the method of appointment of public members of the SIC. As of October 2011, the SIC has implemented or is in the process of implementing more than 50 of the 82 reform recommendations made by Ennis Knupp.

Investment Income

Investment earnings credited to the General Fund are from three primary sources: the LGPF, the Severance Tax Permanent Fund, and cash balances held by the State Treasurer. Income from the LGPF is distributed among the beneficiary institutions and public schools. The allocation received by the public schools, which is approximately 83 percent, is deposited in the General Fund. For the 2011 Fiscal Year, \$446.2 million of LGPF distributions were transferred to the General Fund for public school purposes. The State distributed \$184.6 million of income from the Severance Tax Permanent Fund, all of which was deposited in the General Fund. In the 2011 Fiscal Year, the Treasurer's cash balances produced \$17.6 million for the General Fund. Total investment income credited to the General Fund was \$648.4 million. This is 12.0 percent of recurring General Fund receipts.

PROPERTY VALUATION AND TAXATION

The valuation of oil and natural gas production and the assessment of the *ad valorem* production tax are based on the actual value of production on a monthly basis from September 1 to August 31. Oil and natural gas are valued for the calendar year preceding the property tax year, as established in Section 7-32-15 NMSA 1978. For rate setting, the Local Government Division of the DFA may adjust the State levy for changes in oil and natural gas values.

In November 1998, the New Mexico electorate approved an amendment to Section 1 of Article VIII of the State Constitution to authorize the Legislature to limit increases in residential property valuation for property taxes. The limitation may be applied to classes of residential property taxpayers based on owner-occupancy, age or income. The limitations may be authorized statewide or at the option of a local jurisdiction and may include conditions. Any valuation limitations authorized as a local jurisdiction option shall provide for applying statewide or multi-jurisdictional property tax rates to the value of the property as if the valuations increase limitation did not apply. This amendment and related legislation may have an impact on future property taxation increases.

The 2000 Legislature passed and the Governor signed legislation limiting the increase in the value of residential property for property valuation purposes. Section 7-36-21.3 NMSA 1978 provides for a freezing of values for single-family dwellings occupied by certain low-income owners 65 years of age or older. Another law provides that the value of a residential property in any tax year, starting with

the year 2001, shall not exceed certain percentage increases based on whether the county where the property is situated has a sales assessment ratio of at least 85 percent, as codified in Section 7-36-21.2 NMSA 1978. Sales assessment ratios are computed annually by the Taxation and Revenue Department and measure a county's assessment valuations against current sales information. Counties that have at least an 85 percent sales assessment ratio are considered "current and correct" while counties that fall below that threshold are considered not "current and correct." If a property is situated in a current and correct county, the law limits the annual increase to no more than 3 percent (and 6.1 percent over the value two years ago). If a property is situated in a county that is not current and correct, the law limits the annual increase to 5 percent. In addition, in such a non-current and correct county, the law limits the aggregate annual increases for all properties (excluding net new properties added to the tax rolls) in that county to 3 percent. The annual limitations do not apply to new improvements or to any property that has had a change in ownership, use or zoning during the year.

The 2005 Legislature passed and the Governor signed a bill, codified as Section 7-38-12.1 NMSA 1978, requiring the disclosure only to the County Assessor of sale prices and other items of value upon the sale of residential real property. This amendment has led to an increase in the assessed value of some residential properties.

The 2008 Legislature passed and the Governor signed legislation amending Section 7-36-15 NMSA 1978 to require county assessors to consider, in determining the market value of residential housing, any decrease in value that would be realized by an owner in the sale of the property because of the effects of any affordable housing subsidy, covenant or encumbrance under a federal, state or local housing program that restricts the future use or resale value of the property, or otherwise prohibits the owner from fully benefiting from any enhanced value of the property.

In August 2009, in the case of *Dzur v. Bernalillo County Valuation Protests Board*, No. CV-2008-12410, Judge Baca of the New Mexico Second Judicial District (comprising Bernalillo County, the county in which Albuquerque, New Mexico's largest city, is located) issued an opinion and order finding certain sections of the New Mexico Property Tax Code, providing for limitations on annual increases in valuations of residential property except for residential property as to which a change of ownership has occurred in the prior tax year, inconsistent with Article VIII, Section 1 of the New Mexico Constitution by creating an inappropriate classification limiting valuation increases on residential properties which did not apply to residential properties as to which a change of ownership occurred. Judge Baca's ruling ordered that the statute be applied in a manner so as to apply the valuation limitation without regard to when residential property is acquired. A similar ruling has been made by another district court judge in *Wang v. Bernalillo County Assessor*, No. CV-2007-10109. Numerous other suits seeking refund of property taxes already paid by over 2,400 plaintiffs are reported to be pending in the Second Judicial District. The Bernalillo County Assessor decided not to appeal Judge Baca's decision and rolled back all potentially affected 2010 single family residential property values to reflect the two court rulings. Judge Baca has, in two pending but undecided cases, issued a certification order asking for review of the issue by the New Mexico Court of Appeals. Currently, the New Mexico Court of Appeals has placed on its general docket two cases that raise the constitutionality of the valuation cap on residential increases. The Legislature considered various bills dealing with the valuation cap on residential increases in the 2010 special legislative session, but no bills were enacted into law. To the extent that court or legislative action is taken or a further Constitutional amendment is passed amending the valuation provisions, it could have a material impact on the valuation of residential property.

In February 2011, Judge Manuel Arrieta of the Third Judicial District (comprising Doña Ana County, the County in which Las Cruces, New Mexico's second largest city, is located) also declared

certain limitations on annual increases in valuation of residential property unconstitutional. At this time, the Doña Ana County Assessor has no plans to challenge the ruling in the New Mexico Court of Appeals.

The effect of the court cases, the Bernalillo County Assessor’s announcement, and the possibility of further lawsuits in other counties is not known. Any material reduction in residential property values statewide could result in a diminution of state general obligation bond capacity. Additionally, limitations on assessments could cause an increase to the property tax levied against tax payers necessary to pay debt service on state general obligation bonds.

Production and Property Taxes on Oil and Natural Gas

Current effective production tax rates expressed on ad valorem and unit bases are shown below. The rates were based on data from Fiscal Year 2011 and reflect an average sales price of \$84.60 per barrel for oil and \$5.50 per thousand cubic feet (mcf) for natural gas. The gross rates presented in the table below show taxes paid as a percentage of gross sales value before subtracting allowable deductions and tax credits. The gross tax per unit is also based on gross sales value. The net tax per unit, however, is also based on taxable value before subtracting allowable deductions and tax credits.

Production, Sales, and Property Taxes on Coal

Total State production and property taxes on coal totaled approximately \$24.8 million in Fiscal Year 2011, down from approximately \$34.3 million in Fiscal Year 2010. Coal production, however, increased from approximately 23.2 million tons in Fiscal Year 2010 to approximately 24.2 million tons in Fiscal Year 2011. Thus, the average effective tax per ton decreased from approximately \$1.48 in Fiscal Year 2010 to approximately \$1.02 per ton for Fiscal Year 2011. With total sales revenue of over \$715 million in Fiscal Year 2011, the average effective tax was 3.46 percent of total sales revenue. This does not include the gross receipts tax. The average burden of production, property, and gross receipts taxes on a ton of coal produced and sold during Fiscal Year 2011 is shown in Table 19.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

TABLE 19

Tax Burden on Coal for Fiscal Year 2011

Type of Tax	Tax per Ton	Effective Tax Rate	Taxes Collected
Severance Tax and Surtax (Net of ITC)	\$0.51	1.70%	\$ 12,402,777
Resource Excise Tax	\$0.21	0.70%	\$ 4,977,169
Conservation Tax	<u>\$0.05</u>	<u>0.18%</u>	<u>\$ 1,310,089</u>
Total Production Taxes	<u>\$0.77</u>	<u>2.61%</u>	<u>\$ 18,690,035</u>
Property Tax	\$0.25	0.85%	\$ 6,123,173
Gross Receipts Tax	<u>\$1.80</u>	<u>6.09%</u>	<u>\$ 43,591,786</u>
Total Production and Non-Production Taxes	<u>\$2.83</u>	<u>9.56%</u>	<u>\$ 68,404,994</u>
Price per Ton			\$ 28.97
Total Production (Short Tons)			24,212,467
Total Value			\$ 715,425,158

⁽¹⁾ The figures reported in this table come from the New Mexico Taxation and Revenue Department's GenTax System. They reflect only the information contained in all tax returns and amendments filed during Fiscal Year 2011. These figures differ from actual distributions made by the Taxation and Revenue Department's Financial Services Bureau, as the distributions include penalties, interest, and other modifications such as previously unallocated or unidentified receipts. Total production is based on volumes reported on severance tax returns, which differ from the volumes reported on resource excise tax returns.

⁽²⁾ Property taxes were billed in calendar year 2010 and due in Fiscal Year 2011.

Source: *New Mexico Taxation and Revenue Department, Tax Analysis, Research and Statistics Office (the GenTax System, Financial Services Bureau and Property Tax Division's Central Assessment Unit).*

Statutory rates for the resources excise tax and the conservation tax are effectively reduced by a deduction for Federal, State and Indian royalties. The effective severance tax rate on coal reflects the mix of old and new contract sales and of underground and surface mines. Property tax pertains to both equipment and production values. Fundamental differences in tax bases preclude a true comparison between property taxes and other taxes shown above. However, property taxes are included in this analysis to prevent understating the tax burden.

In addition to production taxes, gross receipts tax is imposed on coal produced and sold within the State. During Fiscal Year 2010, 65.5 percent of all coal produced in the State and supplied to electricity generating stations was supplied to power plants in New Mexico. The remaining 34.5 percent was transported by rail to electricity generators in Arizona. 94.8 percent of all coal produced in New Mexico is subject to the gross receipts tax. The combined state and local tax rate for Fiscal Year 2011 is 6.429 percent of taxable gross receipts.

Additional Information

Additional financial information from government agencies of the State may be obtained online from the State's Sunshine Portal. The information contained in the Sunshine Portal database may change over time. The State Board of Finance assumes no responsibility or liability for the contents of the Sunshine Portal. The State Board of Finance also maintains a website containing general information about the State and its bond programs.
